#### **NB!** You are about to purchase a complex product which may be difficult to understand

The Fund is recommended to clients with a medium risk appetite and a preference for sustainability in order to implement medium term financial goals as part of a multi-component investment portfolio. This Fund may not be suitable for investors wishing to withdraw their money from the Fund within 5 years.

#### What kind of a product is this?

**Type of the Fund:** A public open-ended investment fund harmonised in accordance with the AIFM Directive, established for an indefinite term. The Fund does not pay any yield from the capital gain; instead, it reinvests the sum in its entirety.

**Maturity:** The fund has been set up for an indefinite term. The decision for the opening of a procedure for the dissolution of the Fund lies with the Fund Manager or the Supervisory Authority. It is mandatory to open proceedings in the cases listed in Section 75(2)(a)-(e) of the Collective Investments Act.

**LEI Code:** 5299002UW0C0WRHLJ645

**Depository of the Fund:** OTP Bank Plc.

**Benchmark Index:** 95% MSCI World ESG Focus+5% RMAX Index. The Fund is not index-tracking, the composition of the benchmark index is used by the Fund Manager for investment decision-making and for measuring the performance of the Fund. Deviation from the benchmark index is not restricted. The composition and performance of the fund may deviate significantly or completely, in the short or long term, in a positive or negative direction from the benchmark index. The Fund will not pay any return on capital gains, the entire capital gains will be reinvested. The return is measured by the change in the net asset value of the units.

**Investment objectives:** The Fund aims to provide investors with the opportunity to benefit from the returns of developed foreign equity markets through actively and passively managed equity funds, ETFs and, to a lesser extent, direct equity investments. The Fund Manager integrates sustainability risks and their management in the Fund's investment decision making processes; accordingly, the Fund is in line with Article 6 of the SFDR Regulation. The Fund Manager has established the Fund as a product falling under the category of a financial product promoting environmental or social features or a combination thereof as defined by the SFDR Regulation (EU 2019/2088) (SFDR Article 8 fund), but does not classify it as a financial product aiming at sustainable investment. In making its investment decisions relevant to the Fund, the Fund Manager considers and duly assesses sustainability risks arising from environmental, social and governance aspects among all risks associated with the investment. Funds are selected taking into account qualitative and quantitative indicators, so that the overall portfolio composition reflects the level of risk advertised for the whole fund.

**Main categories of the eligible financial instruments constituting the subject matter of the investment:** government securities and securities guaranteed by the state, bank deposits, repo and reverse repo agreements, mortgage bonds, other debt securities (securities issued by other entities such as companies, credit institutions, municipalities, other institutions), convertible bonds, financial market instruments, shares, other securities issued abroad, and collective investment securities.

**Targeted retail investors:** The Fund is intended for retail investors who intend to hold the product for the recommended investment period and have a sustainability preference, can bear possible losses due to market movements (loss tolerance is medium) during or at the end of the agreed period, have a medium risk tolerance and significant knowledge and/or experience about this or similar products. The Fund Units issued by the Fund can be purchased in Hungary by resident and non-resident natural and legal persons – except US citizens – provided that they comply with the rules defined in the terms and conditions of the offering. Pursuant to legal obligations, this document, the Fund's Prospectus and Management Regulations, as well as the reports for regular information purposes, the Extraordinary Announcements and the Fund's notices and information on distributions to Investors are published in Hungarian free of charge on the Fund's website, on the Fund's product page ([https://www.otpbank.hu/otpalapkezelo/hu/A\\_Omega](https://www.otpbank.hu/otpalapkezelo/hu/A_Omega)) under the Downloads menu and on the Announcements menu (<https://www.otpbank.hu/otpalapkezelo/hu/Aktualis/Kozlemenyek/2024>).

**Trade in the Fund Units:** The Fund's units are continuously traded. You may redeem your Fund Units during continuous trading before the end of the recommended investment term under the terms and conditions specified in the prevailing Announcements published by the various Distributors. Fund units can be purchased and redeemed on any trading day during the business hours of points of sale. In the case of the purchase or redemption of Fund Units, the Trading Payment Day is the third trading day following the day of contract conclusion. (T+3 settlement).

#### The risks associated with the product and what I can get in exchange

The risk indicator assumes that you will hold the product for 5 years.

The aggregate risk ratio indicates the level of the risks associated with the Fund in comparison with other products. It shows the probability of the Fund generating a financial loss as a consequence of market movements or because OTP Fund Management Ltd. cannot make payments because of insolvency. This product is classified as 4 out of 7 classes, which is a medium risk class. This indicator classifies the potential losses from future performance as medium. Poor market conditions may affect OTP Fund Management Ltd's ability to pay you. A detailed explanation of the risks associated with the fund is included in Chapter 26 of the Fund Management Policy. The actual risk may vary materially if you sell the fund units before the expiry of the recommended investment period and you may even receive a smaller amount. The Fund's Fund Units are denominated in a currency other than the official currency of the Member State in which they are offered, thus the return expressed in the official currency of the Member State in which they are offered may differ depending on exchange rate fluctuations. This risk is not taken into account by the above indicator. Please note that the past return and performance of the Fund do not guarantee its future performance and return. The risk factor indicated does not necessarily remain the same and may change over time. Not even the lowest risk investments are altogether risk-free. This product provides no protection from any negative future change in market performance therefore investors might lose part or, in extreme cases, the whole of their investments.

#### Performance scenarios:

This table shows the amounts you can receive at the end of the first year and after the recommended holding period, if you invest, for example, an amount of EUR 10,000.

Scenarios		1 year	5 years (recommended holding period)
<b>Stress scenario</b>	The amount you may receive net of the costs (in EUR)	7,277	5,542
	Average annual return	-27.23%	-11.13%
<b>Unfavourable scenario</b> <i>This scenario type refers to an investment made between 03/2015 and 03/2020</i>	The amount you may receive net of the costs (in EUR)	9,480	11,888
	Average annual return	-5.20%	3.52%
<b>Moderate scenario</b> <i>This scenario type refers to an investment made between 04/2017 and 04/2022</i>	The amount you may receive net of the costs (in EUR)	10,292	14,774
	Average annual return	2.92%	8.12%
<b>Favourable scenarios</b> <i>This scenario type refers to an investment made between 10/2016 and 10/2021</i>	The amount you may receive net of the costs (in EUR)	11,553	16,855
	Average annual return	15.53%	11.01%

The Fund does not have a minimum guaranteed return and you may lose some or all of your investment. The above scenarios show you how your investment may perform. This is what you can compare with other products' scenarios. The scenarios presented above are estimates of the expected future performance of your investment based on past events; they are not precise indicators. The amount you will receive in return will depend on the performance of the markets and the length of the holding period. The stress scenario shows the amount you might receive in extreme market circumstances without factoring in the possibility of the issuer's inability to pay. The adverse, moderate and favourable scenarios presented are illustrations using the Fund's worst, average and best performance over the past 10 years. The future evolution of markets could be very different. The above figures include all of the product's own costs, but they do not include those you pay to your advisor or distributor. The above figures also do not take into account your personal taxation circumstances, which may also affect the amount you receive.

#### What if OTP Fund Management cannot pay you?

The fund is a special pool of assets that is separate from the assets of the company managing the fund. Therefore, there is no default risk associated with the management company (e.g. if it becomes insolvent). In Hungary, fund managers operate under a strict capital adequacy regime. Nevertheless, if OTP Fund Management Ltd. were to become insolvent, this event would not jeopardise the repayment of Investors' savings. Liability for the loss of the Fund's financial assets placed in deposit shall lie with the Depositary in case they are lost – in the cases specified in the relevant pieces of legislation – by the Depositary or a third person engaged in deposit management. Where the financial instruments held in custody are lost, the Depositary shall return financial instruments of identical type or the corresponding amount to the Fund without undue delay. The Depositary of the Fund shall be a member of the Investor Protection Fund (BEVA). For details of the terms and limits of the BEVA Investor Guarantee Scheme, please visit <https://bva.hu/hu/>.

#### The costs to be incurred

The person advising you on or selling you the product may also charge other costs. In this case they inform you about such costs, and how they impact your investment. The reduction in yield (RIY) shows the impact of the total cost you will pay on the yield you may earn. The total cost includes the one-off, the current and the auxiliary costs alike. The amounts shown here are the cumulative costs of the product itself, calculated for two different holding periods. They also include any sanction for early exit. The figures are based on an assumed investment of EUR 10,000. The figures are estimated on the basis of the moderate performance scenario and may change over time.

#### Changes in costs over time

The table shows the amounts that are used from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well it performs. The amounts shown here are illustrations based on an investment example and different possible investment periods. We have assumed that you will get back the amount invested in the first year (0% annual return). For the other holding periods, the product was assumed to perform according to the moderate scenario.

Changes in costs over time	If you redeem your investment (after 1 year)	If you redeem your investment after 5 years
Total cost	EUR 177.56	EUR 1,061.76
Annual cost impact*	1.75%	1.75% each year

\* This illustrates how costs reduce your return each year over the holding period. It shows, for example, that if you exit after the recommended holding period, your average annual return is expected to be [9.87]% before costs and [8.12]% after costs.

### The composition of the costs

The following table shows the yearly impacts of the various types of costs on the possible return on your investment at the end of the recommended holding period. The meaning of each of the different cost categories is also indicated in the table.

The above costs are based on historical data and may change over time.

#### How long should I hold the product and how can I access my money earlier?

The investment term recommended by the Fund Manager: 5 years. The recommended holding period is determined taking into account the risk rating of the fund and the composition of the underlying portfolio. You may redeem your Fund Units during continuous trading before the end of the recommended investment term under the terms and conditions specified in the prevailing Announcements published by the various Distributors. The actual risk or performance profile may differ significantly if you redeem the product before the end of the recommended holding period.

#### How can I file a complaint?

Complaints concerning actions of the person who informed you about, or sold you, a product may be submitted to that particular person (e.g. your intermediary).
