Requests Menu

Tab Pending request

In this menu you will find all saved requests that have not been sent to the Bank for processing. From the Request Type drop-down menu, you can filter by type of the requests you want to see for the relevant period. To sign a specific request, you need to tick the **Sign** checkbox and then **Submit** to send to the Bank for processing.

In case you are signing in combination with another person, only one of the options will be active:

- Sign, no option to send - second signature is expected
- In case your signature is the second one, the "**Send**" checkbox will become active and you will be able to send it.
- If both "**Sign**" and "**Submit**" options are inactive, it means that you are not allowed to sign this type of request.
- Signing requests containing only changes to user data and limits is done with your current signing method /SMS and PIN code or mToken/.
- Requests that contain a change of rights on accounts and specific rights are signed with a one-time QES (Qualified electronic signature), specially issued for the purpose of the request by Certification Services Company.
