TYPES OF REMOTE ACCESS TOOLS

I. Debit and credit cards

Issuing a card

61.1. Debit and credit cards (collectively referred to as "Cards") are a type of remote access instruments to a payment account owned by the Bank, on which information is stored electronically and is used repeatedly to identify the Cardholder and for remote access to a payment account. .

61.2. The Bank shall not issue Bank Cards that co-brand card-linked payment instruments within the meaning of Regulation (EU) 2015/751 of the European Parliament and of the Council on interchange fees for card-linked payment transactions.

62.1. The validity period of the card, within which the Client can use it, is indicated on the card itself. The validity of the card expires on the last day of the month/year indicated on the card. After its expiry, a new card with a new validity period shall be issued, except for DSK-ISIC cards, which are not automatically reissued.

62.2. The Card shall not be reissued if, by the end of the month preceding the month in which it expires, the Client submits a written request to terminate the Agreement. The Bank shall not re-issue the card when there are any of the grounds for termination provided for in the TERM and TERMINATION Section.

63.1. The Bank shall issue the card on a physical carrier within 10 working days from the date the Client signed the Agreement, and the card shall be handed over to the Client by an employee of the Bank or by courier at an address specified by the Client on the territory of the Republic of Bulgaria. The card is activated by the Client in accordance with para 63.2 and 63.3.

63.2. In the case of delivering a card by courier, the card shall be delivered with a letter containing instructions on its activation, which the Client is obliged to comply with. In order to make the personalized security features of the Card inaccessible to persons other than the Client, the Bank shall provide the Client with a secure environment to activate the Card, where two or more independent elements apply to establish the identity of the Client.

63.3. Outside the hypothesis of para 63.2, upon receipt of the card and the envelope with PIN on paper at an office of the Bank, activation by an employee of the Bank is admissible. In this case, the Client checks the integrity of the envelope and compares the printed part of the card number in the envelope and the corresponding digits of the number on the card. In case of compliance, he/she declares in writing the receipt of the card and the envelope with PIN, after which the card is activated by an employee of the Bank. In case of non-compliance, the Client refuses acceptance. The bank is obliged to issue a new card with a new PIN at its own expense within 10 days. The client must remember his/her PIN, after which he/she undertakes to destroy the sheet on which it is written.

63.4. The Bank shall issue Cards to be delivered by courier only if expressly requested by the Client. In this case, the Card shall be delivered only to the Client in person after verifying his/her identity.

63.4.1. At the time of delivery, the Client shall check the integrity of the envelope provided by the courier. If the Client detects any signs of tampering, tearing or any other damage to the integrity of the package, as well as any discrepancy between the data provided by the Client and the data on the card and/or the cover letter, the Client shall return the card and shall notify the Bank that he/she refuses to accept the package. Upon receipt of the notification, the Bank shall issue a new card at its own expense within 10 days, which shall be made available to the Client.

63.4.2. If the Client cannot be reached by the representative of the courier company at the indicated address, the Card may be collected only at the office chosen by the Client to receive the Card.

63.4.3. The Bank shall not be liable in the event the details provided by the Client for the delivery of the Card are incomplete, inaccurate, incorrect or otherwise resulting in the Card not being delivered to the Client.

63.4.4. In case the card is redirected by the Client to another address, a fee may be applied by the courier company in accordance with the tariff applied by the courier company, which shall be paid by the Client.

63.5. The Client can repeatedly change his/her PIN with a new combination of digits through an ATM terminal device of the Bank. If the Client forgets his/her PIN or enters it incorrectly five times in a row, as a result of which the card is blocked, the Client may request the issuance of a new card with a new PIN to the same account at any office of the Bank or through the electronic channels.

64.1. The Client may request the Bank to issue a new Card in the following cases: **a)** in case of destruction or damage of the Card; **b)** in case of loss, theft or any other confiscation of the Card; **c)** in case the PIN is forgotten.

64.2. The Bank shall issue the new card with a new validity period, except for DSK-ISIC, where in case it is reissued under para. 64.1., the validity period of the new card coincides with the validity period of the reissued card. In all cases of issuing or re-issuing a card, where it has not been received by the Client, the card together with the envelope with the PIN, if any, shall be kept in the Bank's office for six months from the issue date of the card.

65.1. In case a monthly fee is applied for card servicing, in the month of card issuance the amount of the fee is proportional to the number of days from the issue date of the card until the end of the respective month. Upon reissuing the card under para. 64.1., the monthly fee shall be charged in an amount proportional to the number of days from the issue date or from the fee collected in the previous month.

65.2. In the event that an annual service fee applies to the card, it shall be charged in the last month of each year from the issue date of the card, whether or not the card has been used. It is calculated pro rata the number of days from the issue date of the card or from the fee charged for the previous year. Upon termination of the agreement/reissue of the card, an annual fee shall be charged in an amount pro rata the number of days from the issue date of the card or from the fee charged for the previous year, and a new annual fee period shall start for the newly issued credit card, if any.

Use

66.1. The cards shall be used only personally by the Cardholder.

66.2. The cards can be used through their plastic carrier or without it – on the Internet or if they are registered in mobile applications.

66.3. All types of bank cards can be registered in applications (mobile wallet) for mobile devices (mobile phone, smartwatch, tablet, etc.) and thus contactless online transactions can be executed by bringing the mobile device closer to a terminal device supporting such functionality. When registering a card in applications of external providers, in order to increase security, the card number is replaced by a unique number that is used when performing transactions.

66.4. The transactions ordered by the Client may be executed in on-line and off-line mode.

66.5. The Client may execute transactions with his/her card in online mode up to the amount of the available balance on the account, in accordance with the amount of the limits set on his/her card.

66.6. The available balance is equal to the amount of the Client's own funds, increased by the unused part of the agreed overdraft credit, in case there is an Agreement for such.

66.6.1. For credit cards, the available balance is equal to the unused portion of the agreed credit and the Client's own funds. Own funds are not subject to interest and do not change the authorised credit limit and transaction limits. When making payment transactions with the card, own funds are used first, and once these funds are used up, the funds from the credit limit are used.

67.1. Payment transactions with the card in on-line mode are allowed after checking: the available balance, card status and card limits, and the identity of the Client can be established after using any or a combination of personalized security means under para. 58.3. and/or other elements (for example: CVC/CVV code, card name, expiration date or signature).

67.2. The maximum amount for a contactless transaction (by bringing a bank card closer to a terminal device), above which Client verification is mandatory as provided for in para. 67.1., is specified in para. 69.1.

67.3. In order to execute contactless transactions with cards registered in a mobile wallet, in addition to the provisions of para. 67.1, payment transactions may also require unlocking of the mobile device (with a password, fingerprint, facial recognition, etc., in view of the functionalities of the mobile device).

67.4. Unlike on-line transactions, for off-line transactions (e.g., at gas stations, toll booths, etc.), the amount of available account balance, card limits, and the identity of the Client cannot be verified at the time of the transaction. The actual amount of offline transactions is established upon financial presentation of the transaction to the Bank by the payee's payment service provider. In such cases, the account balance may be exceeded, and the provisions of para. 19.7. of these General Terms and Conditions shall apply.

67.5. In cases where, as a result of the collecting outstanding fees and commissions, of executing ordered transactions (including transactions for which the Customer has given consent to the payee, as well as off-line transactions), the credit limit on a credit card is exceeded, the excess shall be treated as an unauthorised overdraft, shall bear interest at the interest rate agreed in the credit card agreement and para. 19.7. shall apply.

67.6. At the request of a bank officer or Merchant, the Client shall also provide ID for identification and signature verification. Failure to provide proof of identity shall be grounds to refuse to process the payment transaction.

It provides the opportunity to order and receive immediate transfers in accordance with para50. to and from persons registered for the Service with the Bank or other payment service provider. The client (sender) selects the recipient of the transfer from the telephone directory of the device on which uses the mobile application. When ordering a transfer, the list of possible recipients will display contacts from the phone directory who have also activated the service with the Bank or with another payment service provider. In the transfer order, the names registered by the recipient (first name and surname), the name with which the recipient is recorded in the Client's telephone directory (sender) and the mobile number are automatically loaded. The service is available to Clients who have registered mobile number for the purpose of in-depth identification and opened a current account in EUR with the Bank (except for credit card accounts, accounts opened for servicing a commodity loan, termless saving accounts, as well as accounts of underage holders).

Upon activation of the Service, the Client's Master Current Account from/to which transfers will be ordered/received is linked to the mobile number for in-depth identity verification, requested by the Bank.

96.2.1. In the event a Client does not use any of the electronic signatures under para. 58.5. and 58.6., he/she may only be the recipient (but not the ordering party) of a transfer by a mobile number.

At DSK Smart, customers can manage the service from the "Settings" menu, having the choice to activate or deactivate the service, activate the service for sending and receiving transfers, or activate the service only for ordering transfers (in which case the client must be registered with an account for receiving transfers in another bank). Customers can also choose a current account to receive transfers in case they have more than one.

96.2.3. By registering for the Service, the Client agrees to receive amounts of transfers ordered to the account linked to the registered mobile phone number, as well as the Bank to credit with these amounts the account registered for receiving Blink P2P transfers.

96.2.5. The Client can cancel the Service at any time through the mobile application, and deactivating it from one device leads to its deactivation on the other devices. The Bank deregisters ex officio clients whose accounts registered for the Service have been blocked or closed, as well as clients who have not ordered/received a Blink P2P transfer within a period of 6 (six) months.

96.2.6. A Trusted Recipient can be removed from the User's list either personally by the Client or automatically upon changing the data which the Trusted Recipient has set when activating the service.

96.3. Through DSK Smart, transfer operations to third parties (intrabank and interbank in EUR and foreign currency, to the budget, payment of university fees, fines to the traffic police, etc.) shall be executed provided that the Client's access enables their execution through Internet Banking, the signature method according to para. 58.6.2. and 58.6.3. is used, and the transactions are within the total daily limit.

In such cases, the Bank shall promptly refund the amount of the transaction and, where applicable, restore the account to the state it would have been in had the incorrectly executed payment transaction not been made. At the Client's request, the Bank shall act with due diligence to follow up the payment transaction and notify the Client of the result without requiring the payer to pay any fees for doing so.

103.2. The Bank shall be liable for a failed or inaccurately executed transaction when the Client is the payee of a transaction for which the payment order has been submitted by the payer, if the Bank has received the amount of the payment transaction within the execution terms. In such cases, the Bank shall immediately credit the Client's account with the relevant amount.

103.4. The Bank shall be liable for a failed or inaccurately executed transaction when a payment order is submitted by the Client as the recipient of the transaction, if the account of the Bank is credited with the amount of the transaction, by immediately crediting the Client's account with the amount of the transaction. At the Client's request, the Bank shall act with due diligence to trace the payment transaction and notify the Client of the result.

106. The Client shall have the right to request the Bank to refund the entire amount of a payment transaction already executed and authorised, where the Client is the payer, if it was ordered by or through the payee (including in the case of bank card transactions ordered through or at the initiative of the payee), within 56 days from the date on which the Client's account was debited and the following conditions are met, proof of which shall be provided: **a)** the exact value of the payment transaction was not indicated at the time the authorisation was granted, and **b)** the value of the payment exceeds the value expected by the Client in view of the Client's previous expenses for similar transactions, the terms of the agreement for opening and servicing a current account, these General Terms and Conditions and other case-specific circumstances, whereas the Client may not invoke reasons related to a currency exchange when the reference exchange rate agreed with the Bank has been applied.

106.1. The Bank shall, within 10 business days of receipt of the request, refund the full amount of the payment transaction to the Client or refuse to refund it, indicating the grounds for refusal and the authorities before which the Client may file an objection if the Client does not accept the reasons for the refusal.

106.2. The Client will not be entitled to a refund under para. 106. where the Client has consented to the execution of the payment transaction directly to the Bank and the Bank or the payee has provided or made available to the Client information about the forthcoming payment transaction in an agreed manner at least 28 days before the date of execution of the payment transaction.

107.1. The Bank shall not be liable in the event of unjustified refusal of third parties to accept transactions ordered via a remote access tool or if a payment initiated by the Client via a remote access tool cannot be executed for technical, communication or other reasons beyond the Bank's control.

107.2. In the event of a Client disputing payment of utility bills made via a remote access tool, the Bank shall provide the Client with the necessary details of the payment, if any. The Bank shall not be liable in case of a wrongly indicated subscriber number when paying such bills.

107.3. The Bank is not a party to the relationship between the Client, merchants, or third parties, including utility providers, when making payment transactions through remote access instruments and is not responsible for the quality of goods and/or services offered by the merchant or third parties, nor for any disputes arising between the merchant/third parties and the Client in this regard.

108. The Bank shall not be liable if a notification made by a third party under para. 60.1. 109.5. The Bank shall not be liable in the event that the Client does not have the necessary licenses to use the other software products required to operate the electronic channels. This also includes cases where the Client uses unlicensed software, as this creates a prerequisite for his/her computer or other equipment to become infected with a malicious code.

110.1. The Client is responsible for all obligations arising from using remote access tools and is responsible for all damages caused by their improper use.

110.2. In case of non-fulfilment of his/her obligations to the Bank in relation to the use of remote access tools, the Client may not make objections based on its relations with third parties.

111. The liability provided for in this Section shall not be incurred in the case of extraordinary and unforeseen circumstances beyond the control of the party claiming the existence of such circumstances, the consequences of which would have inevitably occurred despite the efforts made to prevent them, nor in cases where the Bank has acted in fulfilment of a statutory obligation under the Bulgarian or European Union law.
