Date of Production: 3/31/2022

<http://www.dskbank.bg>

Call +359 2 93 91 304 for more information

Competent Authority: The Financial Supervision Commission is responsible for the regulation of DSK Bank in its capacity of investment intermediary.

You are about to purchase a product that is not simple and may be difficult to understand.

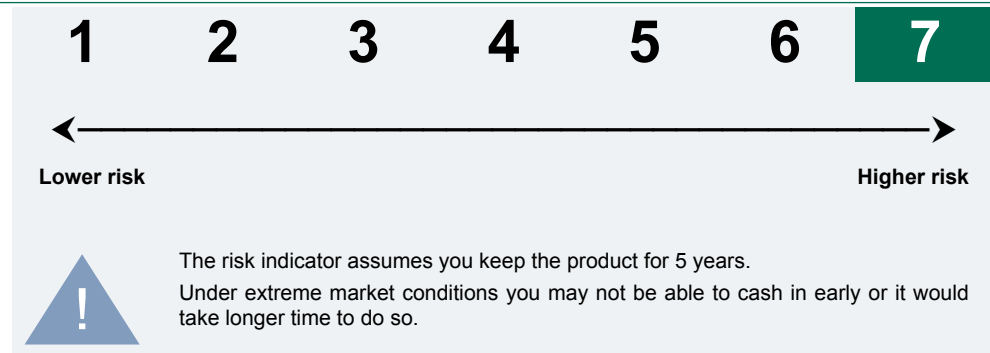

What is this product?

Type	Interest Rate Floor			
Objectives	Interest rate floors are binding agreements under which the buyer receives a compensation payment on the outstanding notional at the end of each calculation period (payment dates) when the reference rate is fixed below the agreed floor rate on the fixing date. In return, the buyer pays an amount of money (option premium) on a pre-agreed date (option premium payment date).			
	Date	3/31/2022	Currency	EUR
	Tenor	5 years	Strike	1.05%
	Notional Amount	EUR 255,768.6867	Variable interest rate	1 month
	Customer	Customer buys	Floor premium	EUR 9,900

Intended retail investor This product, Interest Rate Floor, is aimed at retail clients, who are interested in hedging and who have a long term investment horizon of more than 5 years. The Interest Rate Floor is a product for informed investor with average knowledge of and/or experience with financial products. The investor can bear no or only minor losses of the investment amount and puts emphasis on capital protection.

What are the risks and what could I get in return?*

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class.

This rates the potential losses from future performance at a very high level, and extreme market conditions are very likely to impact the capacity of DSK Bank AD to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

* Further details can be found in the 'How long should I hold it and can I take money out early?' section of this document.

Performance scenarios

Investment of EUR 10,000		1 year	3 years	5 years (Recommended holding period)
Stress scenario	What you might get back after costs	EUR 15,558	EUR 18,420	EUR 18,368
	Average return each year	54.84%	22.54%	12.91%
Unfavourable scenario	What you might get back after costs	EUR 20,915	EUR 20,739	EUR 20,732
	Average return each year	107.48%	27.47%	15.67%
Moderate scenario	What you might get back after costs	EUR 21,378	EUR 21,389	EUR 21,386
	Average return each year	112.03%	28.78%	16.39%
Favourable scenario	What you might get back after costs	EUR 21,763	EUR 21,914	EUR 21,930
	Average return each year	115.80%	29.83%	16.98%

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest EUR 10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation of extreme market conditions where we are not able to pay you.

Under extreme market conditions it could happen that this product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the recommended holding period. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so.

The figures shown include all the costs of the product itself, and include the costs of your service provider.

The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if DSK Bank AD is unable to pay out?

The fulfillment of the Bank's obligation for this product depends on its creditworthiness. You are exposed to the risk that the manufacturer of the product will not be able to fulfill its obligation in relation to it, e. g. in case of insolvency.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account the one-off costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures assume you invest EUR 10,000. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment of EUR 10,000	If you cash in at the recommended holding period
Total costs	EUR 100.00
Impact on return (RIY) per year	0.74 %

Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- What the different cost categories mean.

This table shows the impact on return per year

One-off costs	Entry costs	0.74%	The impact of the costs already included in the price.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.

How long should I hold it and can I take money out early?

Recommended holding period: This product is designed to be held to the agreed 5 years date in order to match your investment requirement.

Under extreme market conditions you may not be able to cash in early, and you may have to pay significant extra costs to cash in early. It is a product to be entered into for its term that cannot be easily sold. Early termination may occur (i) if certain events of default or other termination

ID: #Doc607124#

<http://www.dskbank.bg>

3/31/2022, 2:22:13 AM

events occur or (ii) at the sole discretion of DSK Bank AD, in which case early termination payments may apply. Early exit impact: If the product is terminated early, in whole or in part, an Early Termination Payment may become payable by either you or DSK Bank AD. The Early Termination Payment is linked to market parameters and could be a substantial loss or gain to you. Settlement on early termination will be specific to your Interest Rate Floor and will be influenced by a number of factors which include but are not limited to: whether it is an increasing or decreasing interest rate environment; the movement of the interest rates since the trade date; the amount affected by the early termination.

The Early Termination Payment amount represents the economic value of what DSK Bank AD would have paid or received if the product continued as agreed.

How can I complain?

A customer can file a complaint regarding the product offered through any of the following channels:

- By mail, sent to the address of the Head Office: 19 Moskovska str. / 5 Benkovski str., Sofia 1036, Bulgaria
- By e-mail, sent to the Bank's Call Center: call_center@dskbank.bg
- Through the feedback form on the Bank's website: <https://dskbank.bg/>

A client may submit a complaint to the Financial Supervision Commission as described on its website. Complaints to the Commission can be sent to the address: 16 Budapest Str., 1000 Sofia or to the e-mail: delovodstvo@fsc.bg.
